

DATA MIGRATION

People Force offer a flexible Data Migration service that can support any People Technology implementation project, for organisations of any size:

WHAT PEOPLE SAY ABOUT US

"People Force were extremely diligent, responsive and supportive to our project team. We were impressed with both the speed, skill and attention to detail demonstrated by the Data Consultant. We are very happy with our decision to work with People Force and would wholeheartedly recommend them to other organisations in a similar situation."

ANDREA VOGEL, HEAD OF PEOPLE & ACHIEVEMENT, WAR CHILD

"People Force were engaged by HgCapital to carry out a Data Migration exercise ahead of the migration of our HR information into the new system. This work required People Force to populate the Data Migration Template provided by the vendor. They undertook this work extremely well; paying attention to detail, which ensured that the integrity and quality of staff data was of an extremely high standard. People Force always performed their role with the highest level of quality and professionalism. Through their experience of HR, HRIS and HR Data they provide an extremely valuable service to us."

AMY HUGHES, HEAD OF HR, HGCAPITAL
